

Talk with Bella.

We'll program Bella to answer FAQs unique to your hotel, but to provide a way for you to hear how she might interact with your customers, we've created a pre-production version of Bella.

Pre-production solutions have not been battle-tested with thousands of real calls, and they can sometimes be “temperamental”, but once we have customized Bella for your hotel, she will get smarter with every use.

Try speaking in longer sentences, more narrative in style, to highlight Bella's comprehension. Dial the number below, and when she answers, ask her any of the following questions to test her performance.
